## Quality

Malika Overseas has the infrastructure to ensure that products are developed, manufactured, tested under the highest quality standards before being delivered. Our quality control department plays a key role in ensuring that the products are developed and manufactured to standards that meet and exceed expectations. The incoming raw material undergoes a rigorous schedule of physical tests and chemical analysis to ensure propriety of use. Our quality control laboratory has the latest testing devices for obtaining the most accurate result of our testing. During the manufacturing process floor supervisors conduct hands-on, online analytical tests throughout the production and packaging processes to ensure consistency in the end product quality.

## CSR & Sustainability

Malika Overseas taken its role of a global citizen as a very serious responsibility, every decision is weighted against the impact it would create at the micro and macro level. Systems have been put in place and procedures are implemented that ensure minimalistic damage to the ecosphere.
